

LED Ring Light Kit

On-Stage®

VLD360 / 14414

NEW PRODUCT

Features & Benefits

Enjoy bright, even lighting for your visual content with our VLD360 LED Ring Light Kit. Featuring three modes of color temperature—white, warm white, and warm off-white—that each provide eight levels of brightness, the 10" ring light adapts to a wide range of lighting needs. The light's gooseneck phone holder rotates 360° to enable camera use in portrait or landscape orientation and the light swivels 180° for ease of finding the most flattering angle. A Bluetooth wireless remote shutter for iOS and Android devices controls the camera from up to 25' away, making it easy to produce content on your own. Two ring-light stands—one for desktops and one for use on the floor—each adjust in height for precise lighting of sitting or standing subjects.
